---

Funny. This is going to be an interesting fishing season. I bet we go from winter to summer and bypass spring. The lake my parents live on in northern WI is still frozen. It's only 350 acres and we have owned it more than 30 years. The lake has never been frozen for the WI walleye opener (May 4). There is still 12 inches of ice on the lake. I think it will be frozen. Unbelievable!

I think Tim Glover will be fine. I just want to make sure all of you can have regular discussions. It seems like there is a lot of emails whipping around and effort being wasted setting up meetings. I told John Canar and Chuck this, and I am going to reiterate to GP. The issues regarding SWAC and fish trends need to be resolved and completed well before 5/21. Otherwise, we will be in dispute. Technically the revised FS report is due to EPA on 5/21.

Jim

Jim,

Steve didn't get in touch yet, but Cynthia got back to me promptly via phone, so that may be Steve's way of getting in touch. I'm giving benefit of the doubt until we see who is on the call.

She specifically requested that Tim Glover be involved referring to him as their statistician. I can't speak to who would be best for GP to have involved, but it seems that they want Tim and Cynthia there.

That's about it at the moment....although I also know that they are still driving on our lakes up around Bemidji and points north, so it might be a good year to catch some Muskies still in the shallow weeds come opener!

Although they may be ice fishing on the Walleye opener.

I would think that from the GP/AMEC side that Steve Ellis is the key player for any informal discussion. I need to let AMEC/GP know that their key people need to respond to emails, etc.

Or maybe if Steve isn't available we can proceed with you and Tim. I'm really just guessing at who best to be involved on your end. That is up to you folks of course.
